1. Overview

LN610-X1 is a LoRaWAN node module. LG1301-PF/ LG1301-SE are LoRaWAN gateways. LN610-X1 can work with LG1301 to build a LoRaWAN system if it has firmware inside.

LN610-X1 is a hardware module. It has an MCU inside but no firmware implemented. If firmware is implemented, the feature below can be supported and either LG1301-PF or LG1301-SE can work with LN610-X1. The detail of these two gateways refer to the datasheet of gateway.

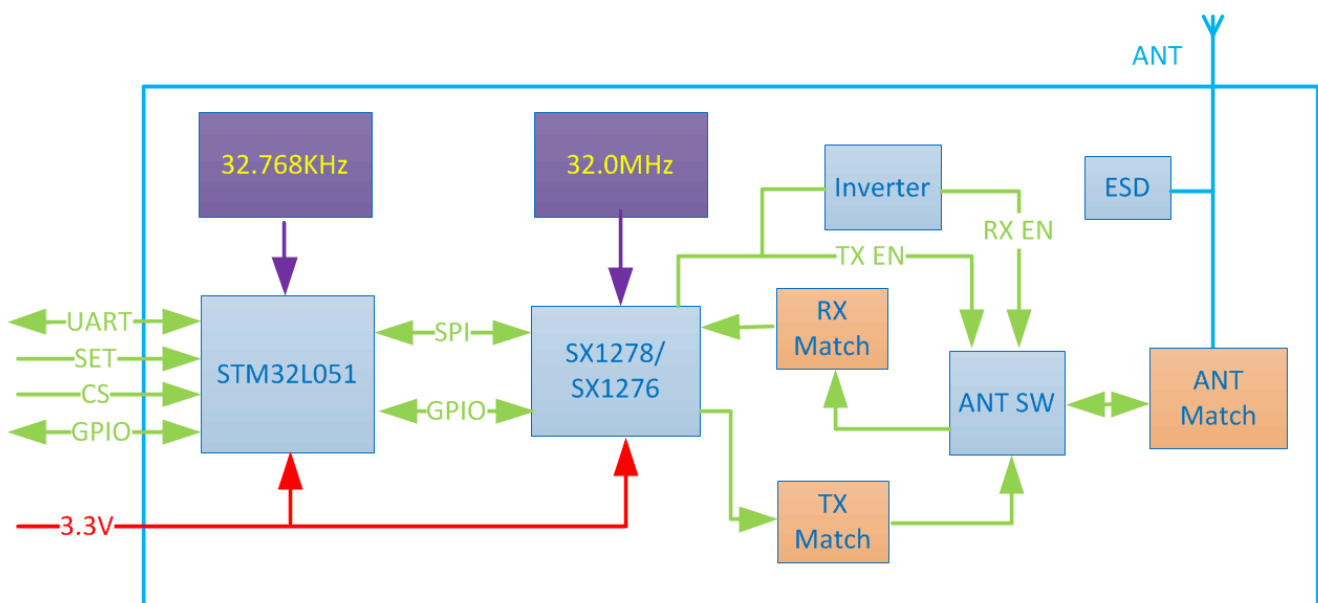

2. Feature

- LoRaWAN protocol supported
